That’s right, I’m talking to you. If you’re under 30, chances are you don’t have health insurance. And you may not be aware of all the ways you could have affordable, high-quality health care coverage:

**PARENTS’ INSURANCE**  If your parents’ plan covers children, you can be added to it or stay on it till you are 26. Learn more

**STUDENT HEALTH PLAN**  Most of these plans meet federal requirements, so you won’t pay a fine for not having insurance. Learn more

**MEDICAID**  If, like many young people, you do not earn more than $16,242 a year, you qualify for this state-run program. Learn more

**AFFORDABLE CARE ACT**  Even as a student, if you make too much for Medicaid, you may get a good deal through HealthCare.gov – and most likely you will qualify for financial aid for these plans. Learn more

**CATASTROPHIC PLAN**  If you think you’re Superman, and only need insurance in case of big disasters, there is a plan for you! Learn more

With all the options there’s no excuse to skip health insurance!
